# Introduction

- Work plan;
- Solutions;
- Field work;
- Data processing;
- Data editing;
- Construction of maps;
- Publication of maps.

+34 degrees for air  
+29 degrees for water

# Plan

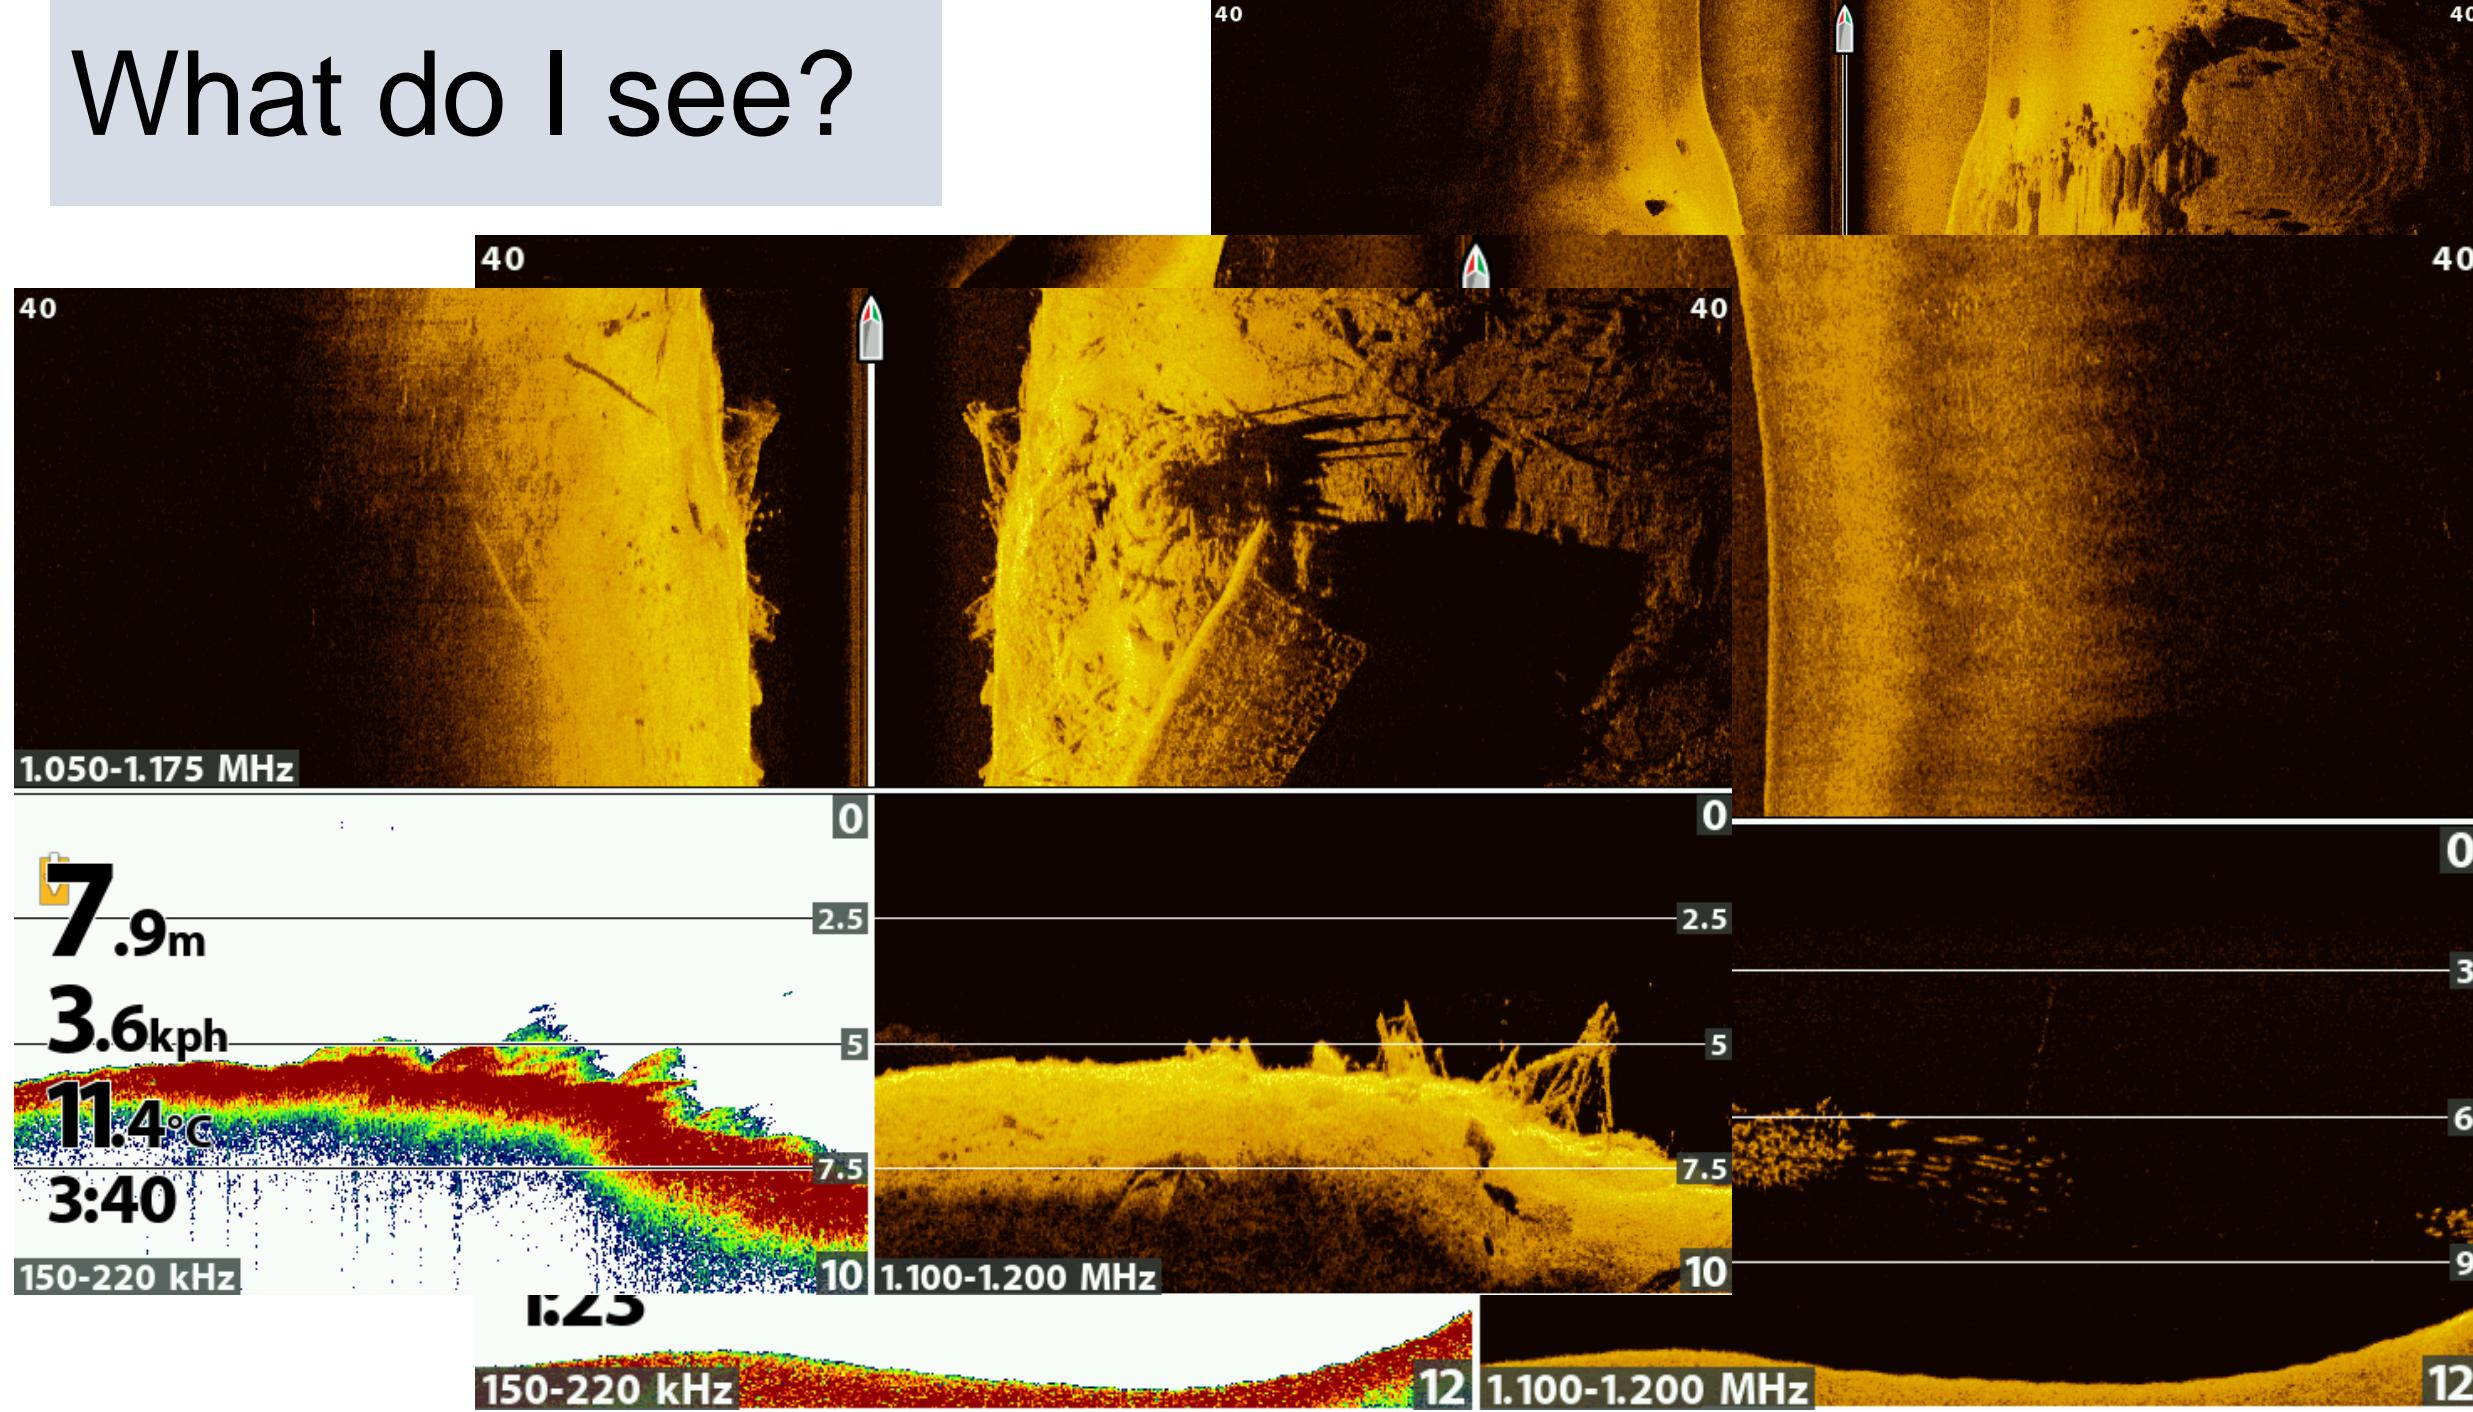

Field work  
05.07.2021. -  
09.07.2021

# Solutions and problems

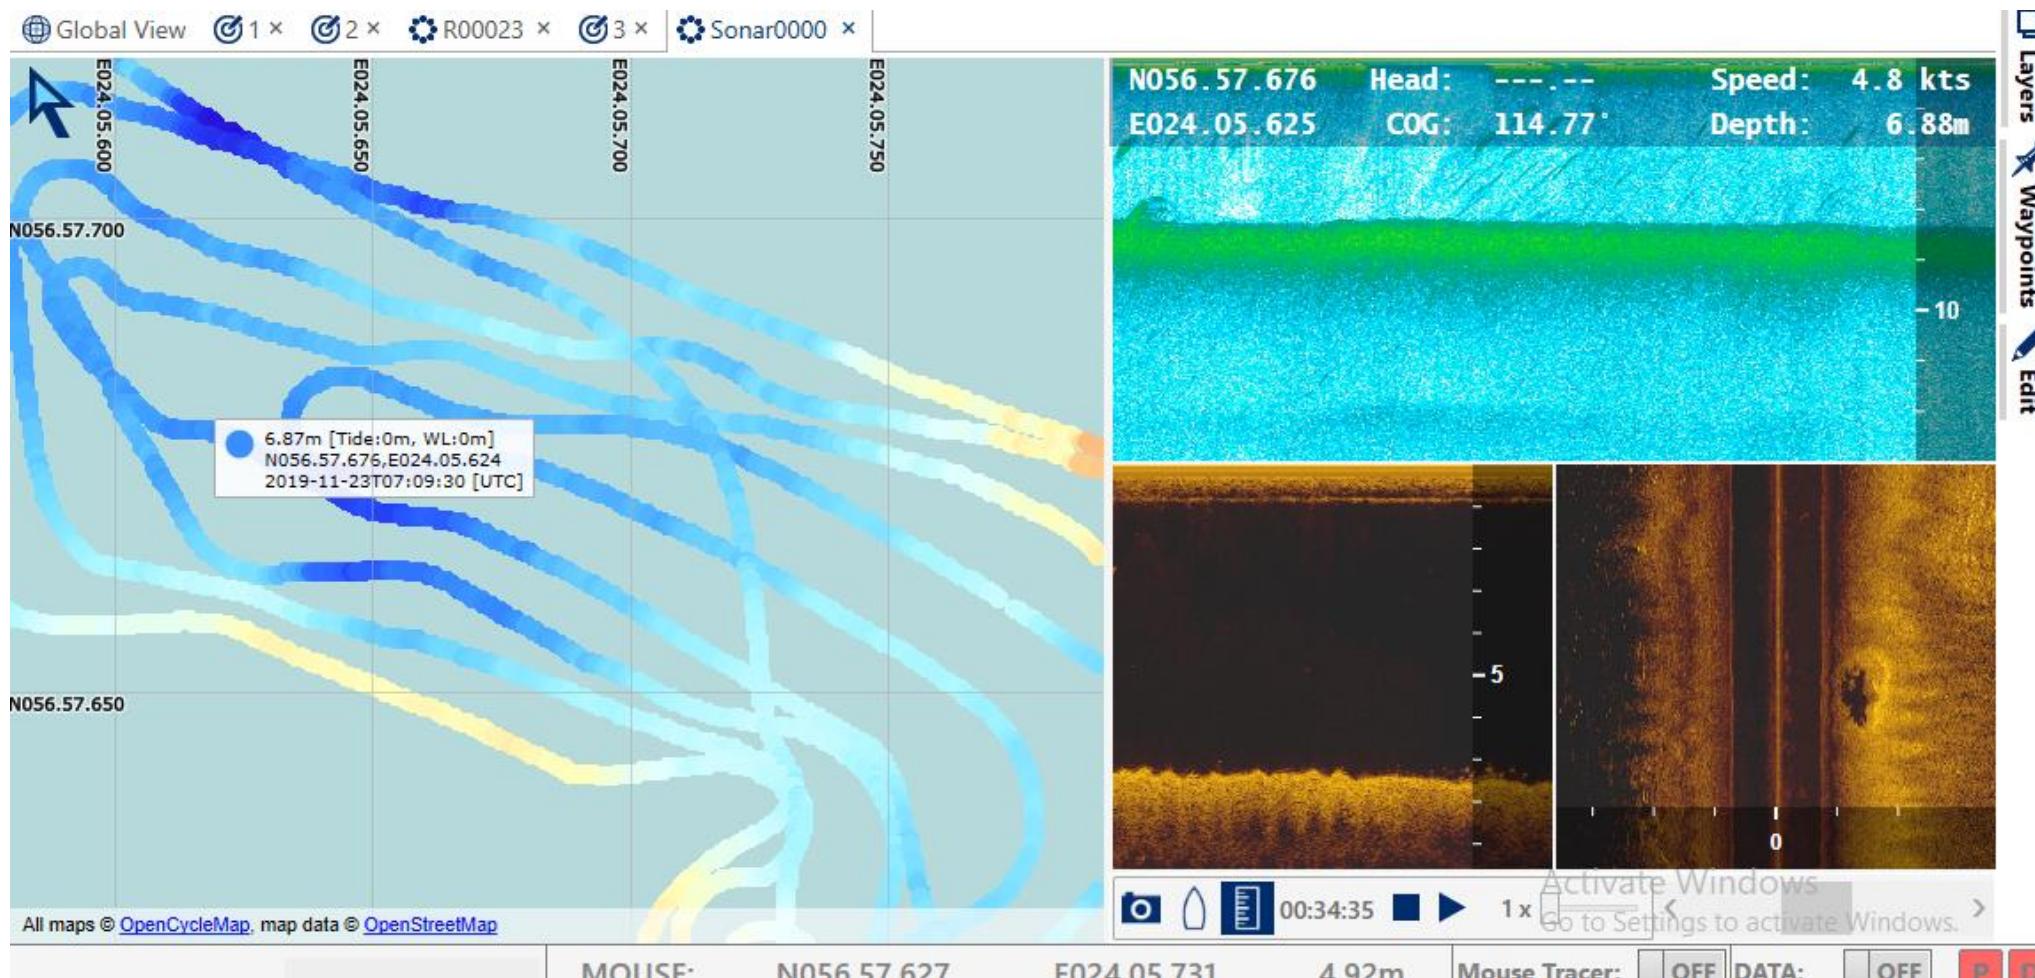

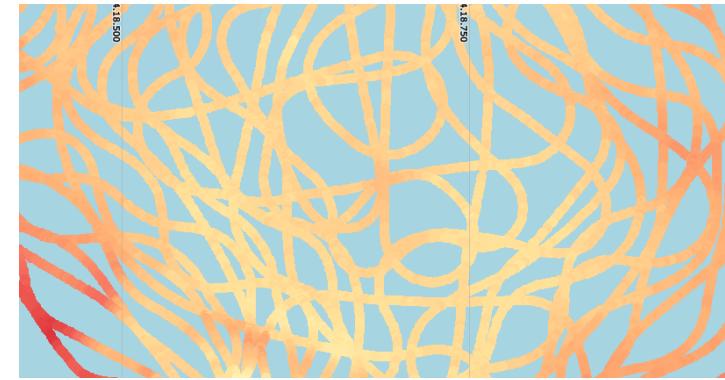

- Overnight stay;
- Boat launch;
- Electricity for sounder;
- Bathymetric survey;
- How to withstand the heat;
- Private properties;
- Safety on the water;
- Covid 19.

# What do I see?

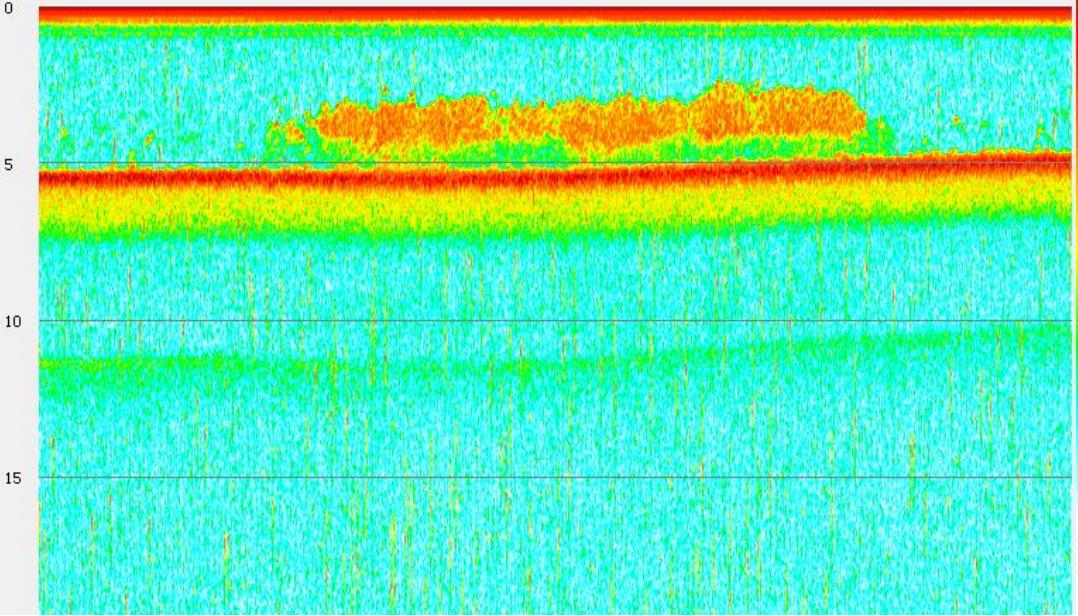

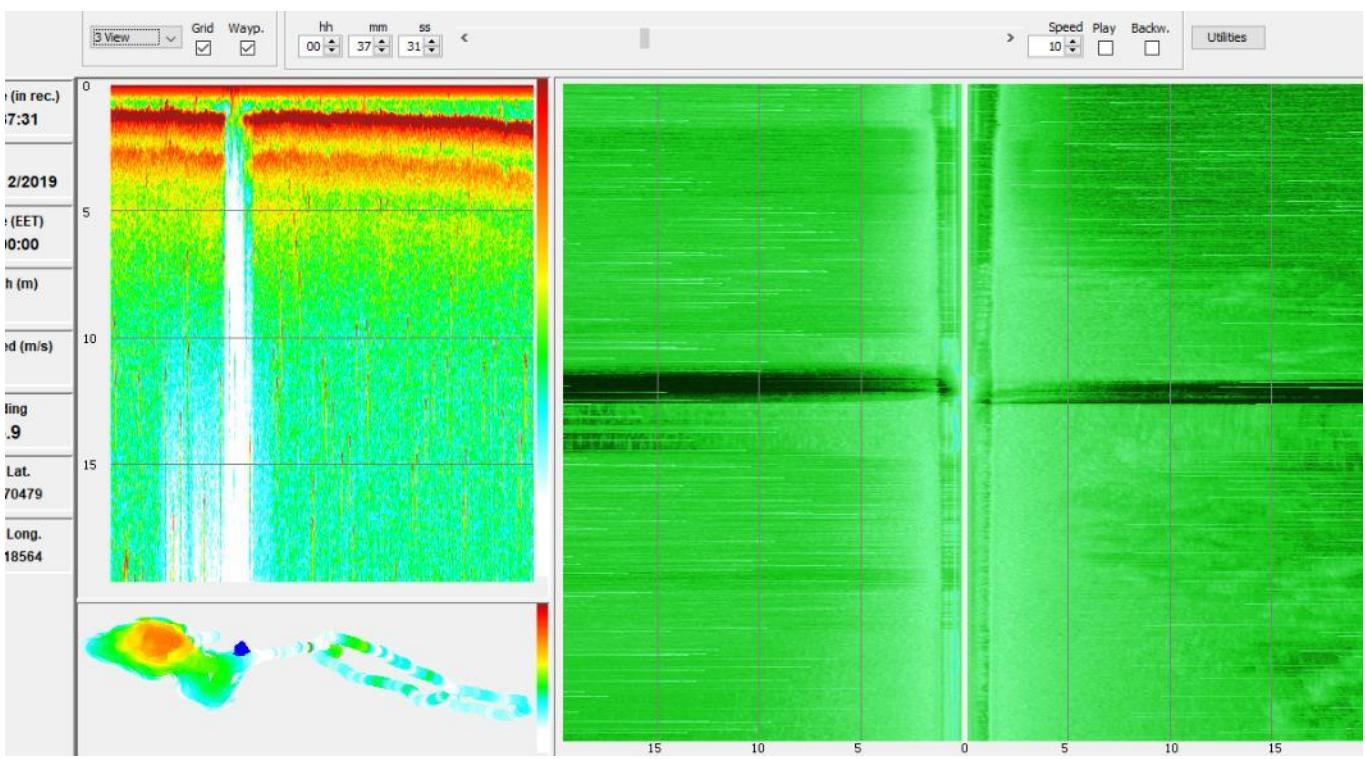

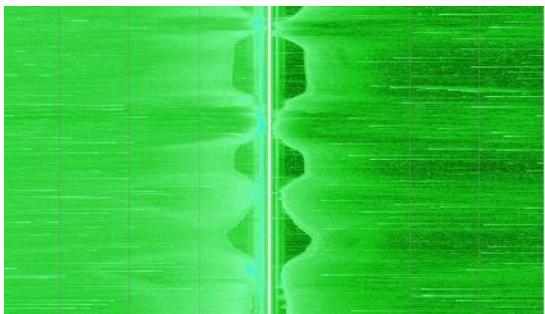

# What does the echosounder see?

# Disturbances

- Water temperature;
- Movement speed;
- Sonar transducer placed in wrong position;
- Water clarity;
- Depth;
- Magnetism, magnetic field.

# Depth map recipe

- Field work;
- Data conversion;
- Data editing;
- Data processing;
- Bathymetric map construction;
- Morphometric calculations,  
catchment construction;
- Bathymetric map conversion.

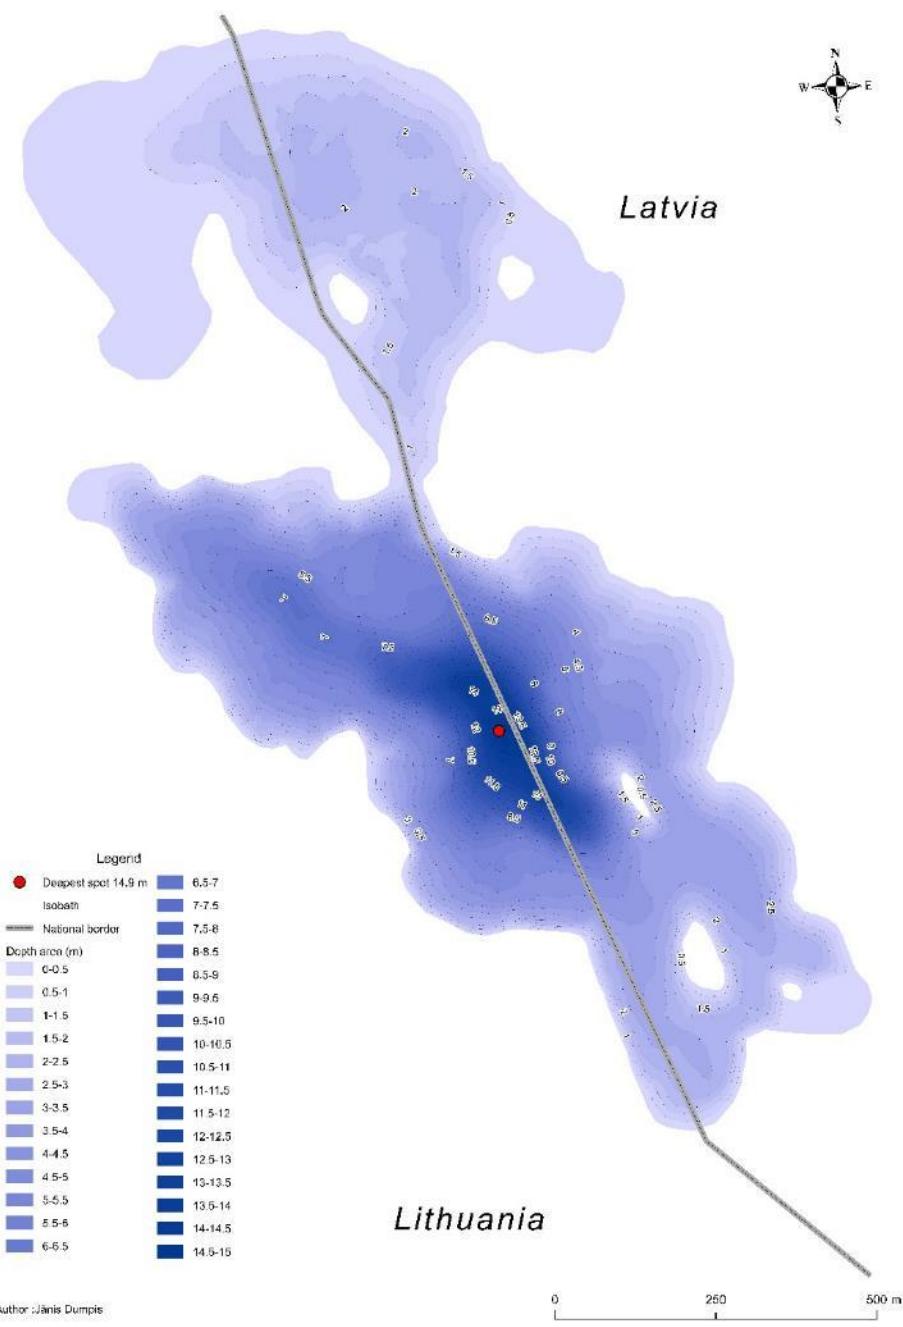

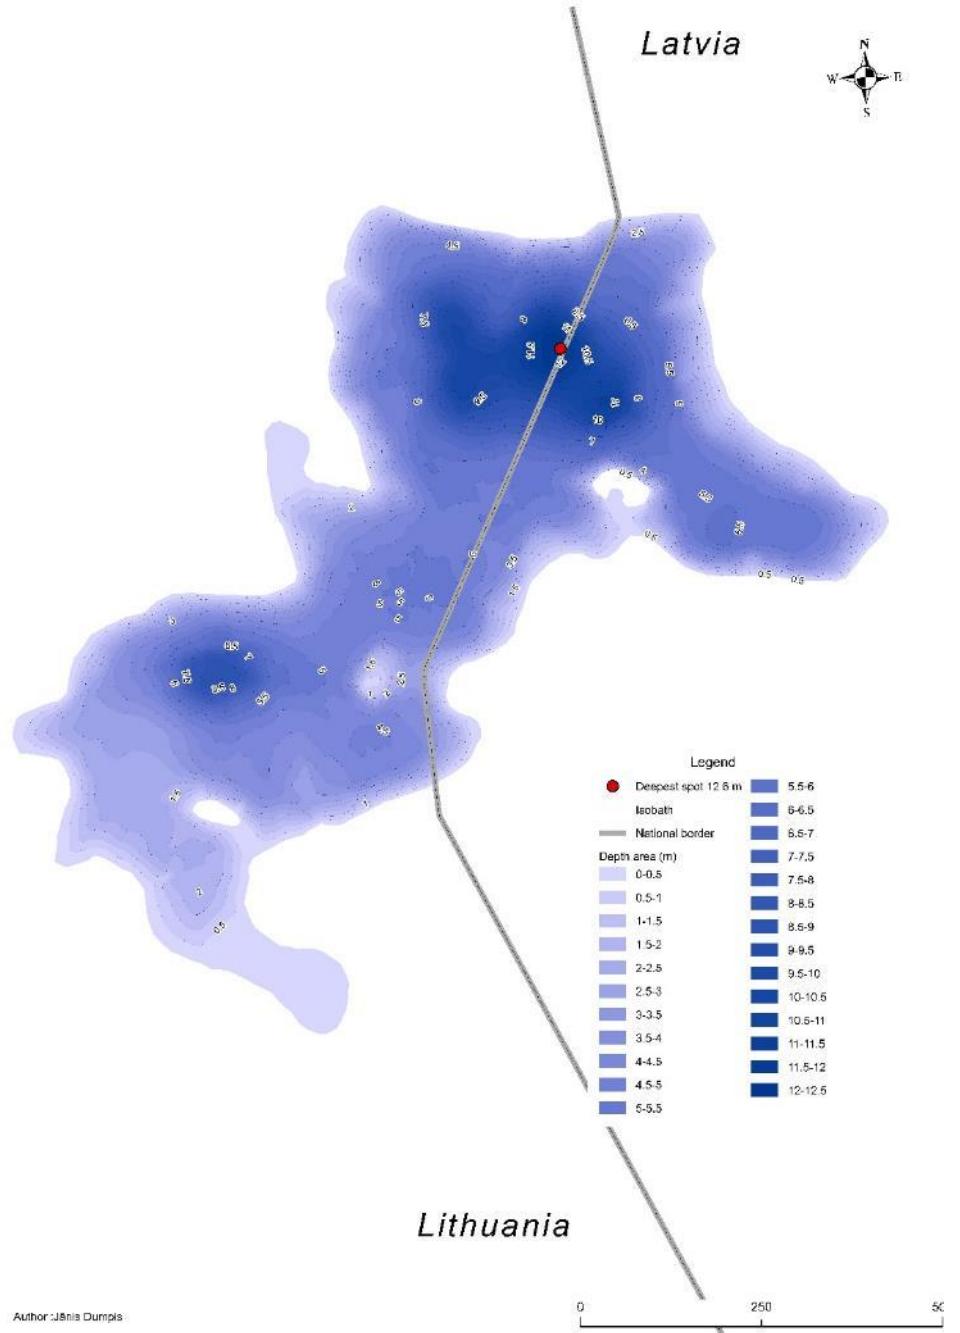

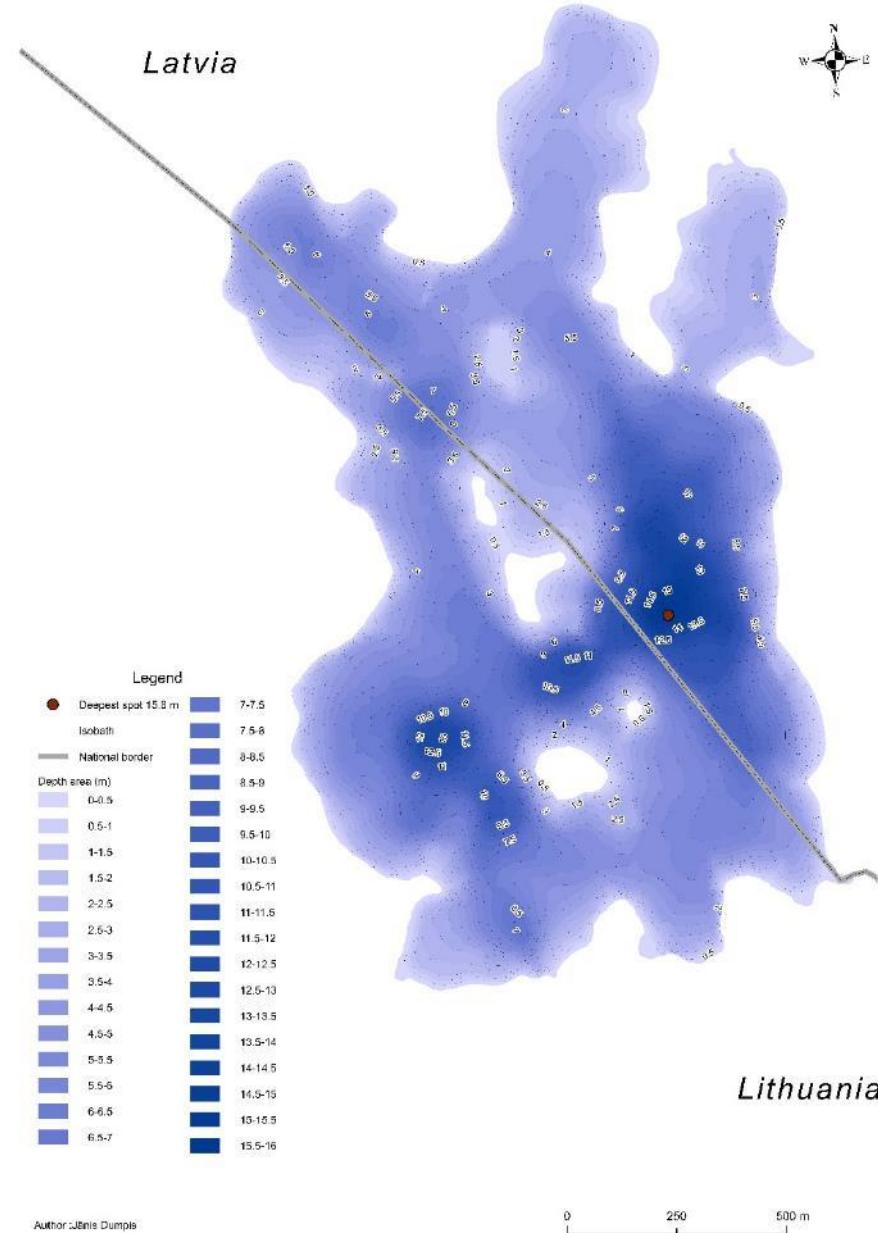

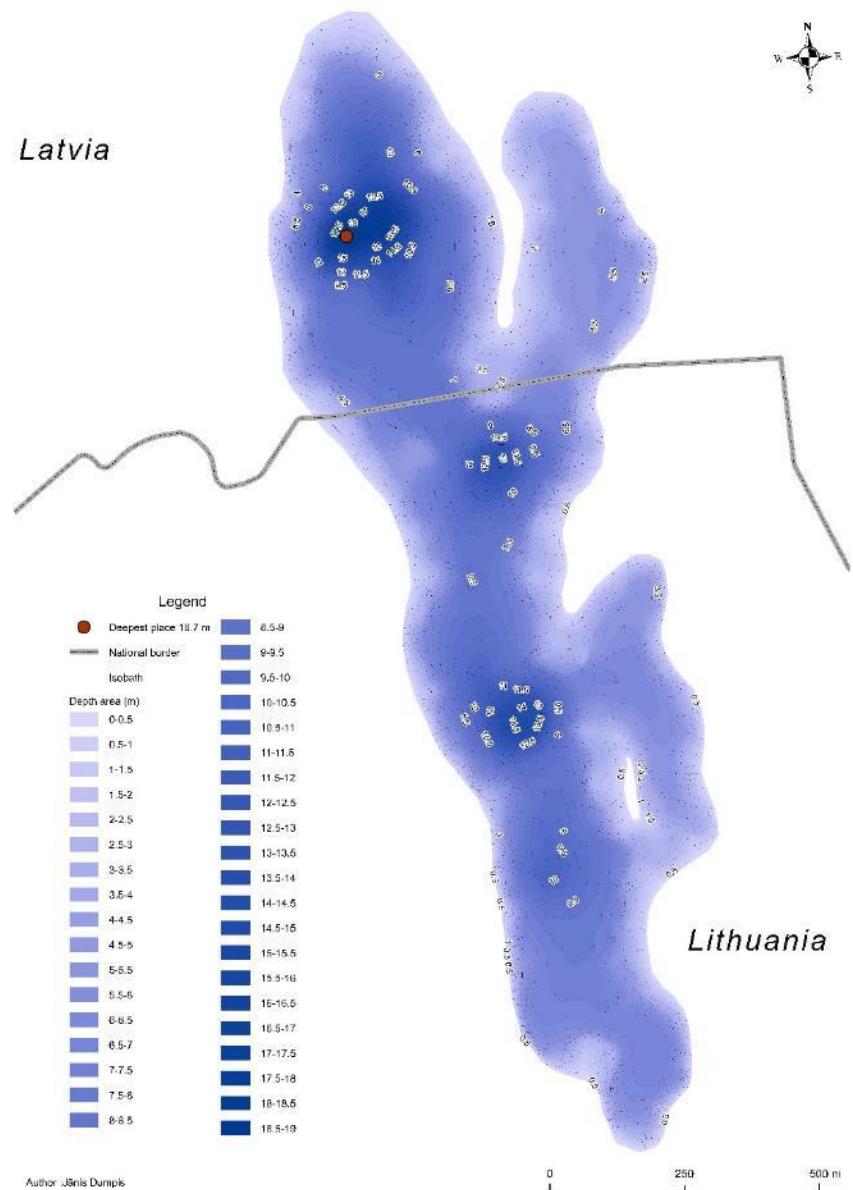

Work plan  
Correct data entry  
Thoughtful activities on the water

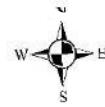

# The result

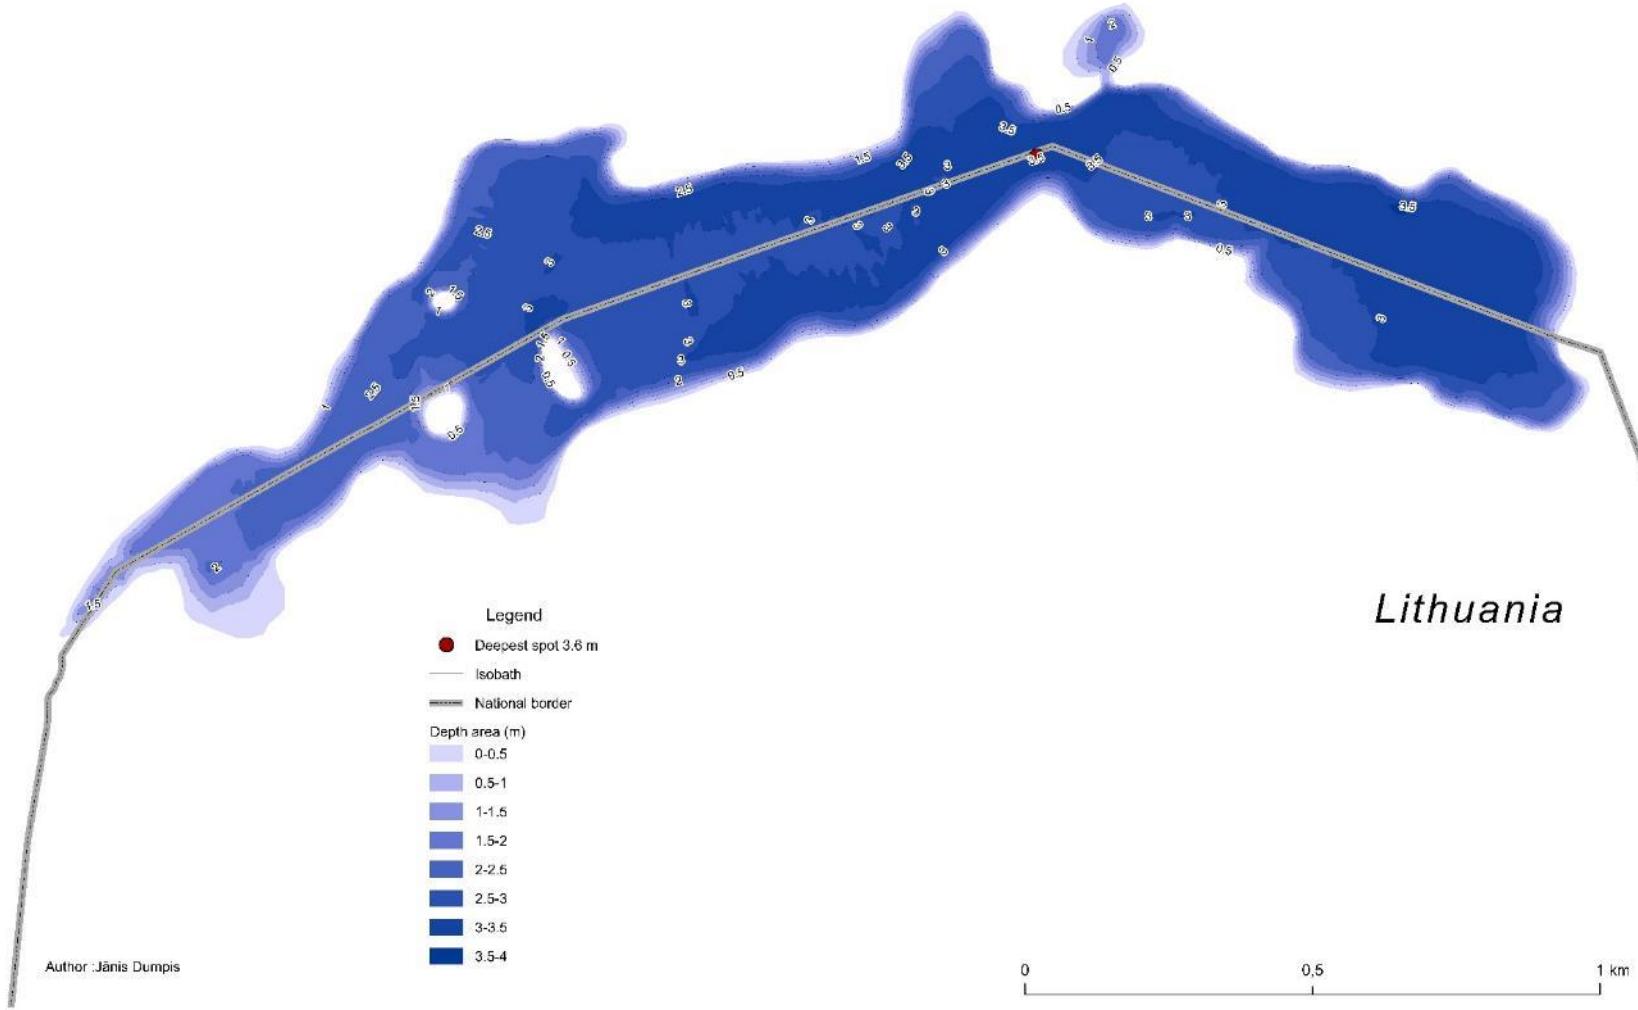

*Latvia*

*Lithuania*

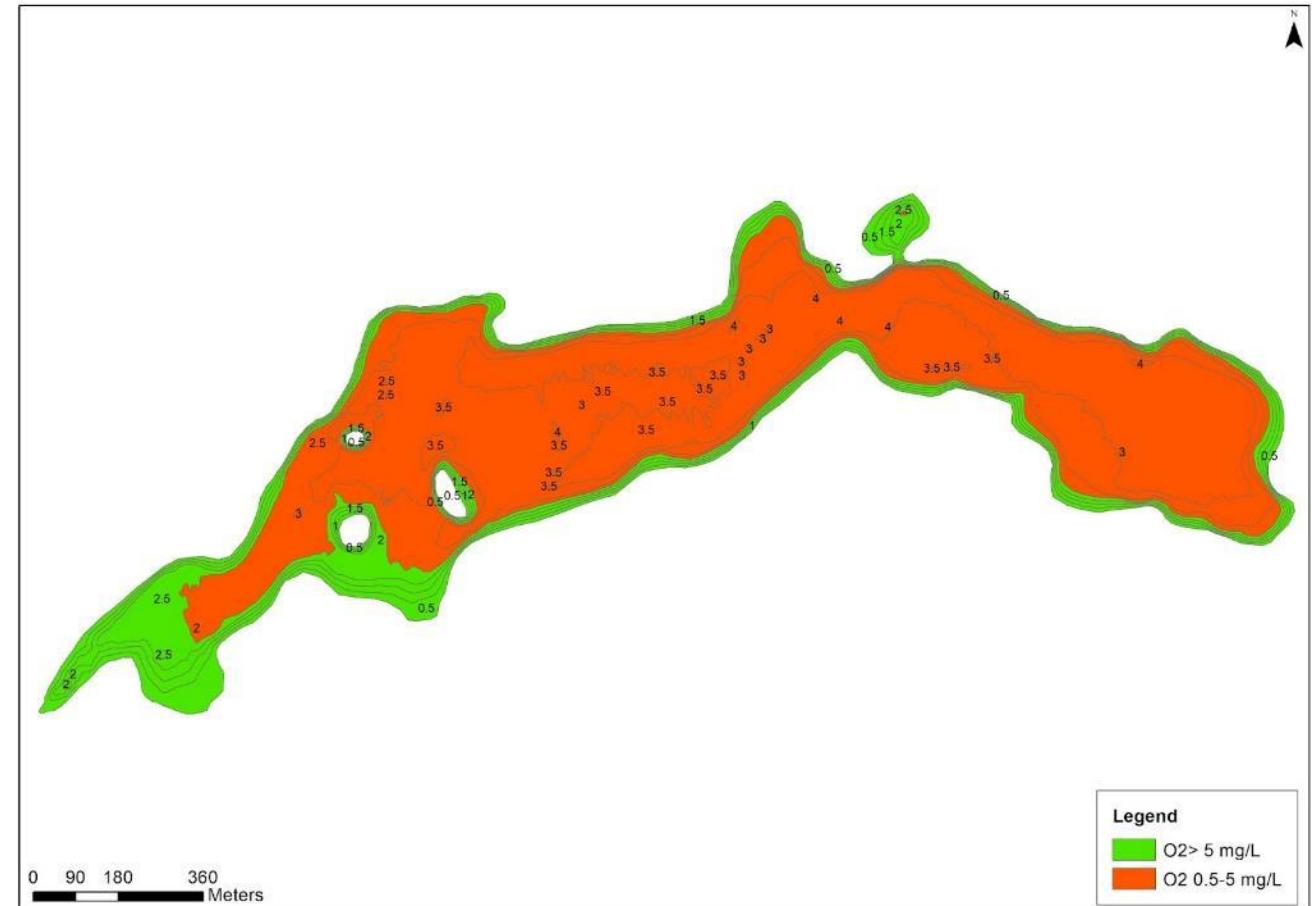

2021. gada vasarā projekta Nr. LLI -533 “Latvijas-Lietuvas pārrobežu upju un ezeru ūdens baseinu vienota pārvaldība” TRANSWAT ietvaros ir izstrādātas batimetriskās kartes Ilzu (Garajā)/Ilgē, Galiņu/Salna, Kumpinišķu/Kampiniskiai un Lauceses/Laukesas un Skirnas ezeros. Kartes pieejamas lejuplādei jpg, kmz, at5 un shp formātos.

- [Ilzu ezers](#)
- [Galiņu ezers](#)
- [Kumpinišķu ezers](#)
- [Lauceses ezers](#)
- [Skirnas ezers](#)

<https://bior.lv/lv/latvijas-lietuvas-parrobezu-ezeru-kartografija>

# What do we get from all this?

- Potential plan for field work;
- Materials for modeling, cartographical base;
- Hydromorphological assessment of lakes;
- Ability to correctly classify and study water bodies;
- Evaluation of the functionality of the water body.

# Thank for your attention!
